These are our quotations of this date, subject to change and being unsold.

Store News

We wish to invite all of our customers and friends to visit our newly remodeled store at the old location, 603-605 East Marshall Street.

You will find there Mr. John H. Thomas, who has been at this location for 28 years with the same pleasant manner and ever ready to greet you.

Mr. Charles M. Smith, whom many of you remember so well at Franklin Street for the last 23 years, wishes to invite his customers and friends to visit him at 603-605 East Marshall Street.

"Lest you forget," Norman Bruce, that dark-haired young fellow from Main Street, who gives you service while you wait, is at 603-605 East Marshall Street also.

It will give these gentlemen the greatest pleasure to talk over your seed and poultry problems with you and cheerfully give you any information they can.

If you cannot call, write or phone.

New Catalogue Being Printed

Our 1932 Catalogue, 62 pages, with 195 illustrations, will be off the press in a few days. If you do not receive your copy by February 10th, drop us a line and it will be sent you at once.

Warm Weather Danger to Bees

Take a look at your beehives. The continued mild weather up to January 15th has been such that there has been very few days your bees have not been flying around.

Dormant Spray Is Necessary

If you expect to have beautiful shrubbery and shade trees this spring, you should not neglect your dormant spray, which should be done any time after the 15th of February until the buds begin to open.

Shade trees and shrubs about the home grounds are frequently infested with scale insects—the most common being Oyster Shell scale, European Elm, Cottony Maple, Tulip and Tarrapin scales.

Oyster Shell Scale

Is a serious pest of Lilac, Poplar, Ash, Willow and Ornamental Dogwood.

Europe Elm Scale

Attacks various species of Elm, infesting crevices of the bark and underneath the limbs.

Cottony Maple Scale

Affects soft Maple and Basswood or Linden.

Tulip Scale

Is an enemy of Tulip and Yellow Poplar trees.

Tarrapin Scale

Attacks Maple and Sycamore trees, causing great damage.

For dormant spray we recommend SPRA-MULSION or LIME SULFUR.

A complete spraying guide and prices cheerfully furnished.

Mild weather makes bees more active and they naturally consume more of their winter stores.

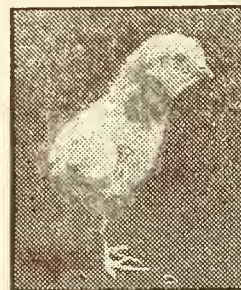

If they went into winter quarters with a limited amount of honey, they may have consumed most of it by this time and will perish before spring if not fed.

See that your hives without supers weigh about 35 or 40 lbs. If they are very light, it is necessary to feed them. Do not open up the hives where the air will chill the bees. It is best to take them to the cellar or basement for feeding this time of year.

If you will write us we will send you full directions as to how to feed bees in winter.

We carry a full line of Lewis' Bee ware.

START CHICKS RIGHT FOR GREATER PROFIT

You will certainly make a costly mistake if you do not feed the baby chicks on a feed that is suited to their delicate systems. You will raise the largest percentage of baby chicks only when you feed them the right starting feed.

Globe Chick Starter is such a chick food. It furnishes all the health giving vitamins and minerals necessary to grow the best chicks and the greater number of the chicks you start with.

Others are raising 95 out of 100 baby chicks and even better percentages with Globe Chick Starter.

That's why we sell Globe Chick Starter. We want our customers to have the best quality in order that they can make the greatest profit in raising chicks.

Better Chicks

"Bred in Old Virginia" Repeat orders prove our quality.

Barred Rock, Rhode Island Red, \$12.00 per 100.

We can supply other breeds on short notice.

DR. HESS POULTRY PAN-A-MIN—Keeps poultry healthy, makes hens lay, is not a stimulant but a Tonic that tones the dormant egg organs; contains internal antiseptics to counteract disease; insures a healthy, singing flock. Has been known to poultry raisers for more than 30 years as Dr. Hess Poultry Pan-a-ce-a. 3-lb. pkg., 50c; 7-lb. pkg., \$1.00; 15-lb. pkg., \$2.00; 25-lb. pkg., \$3.00. Postage extra. 100 lbs., \$10.00.

DR. HESS CHICK TABLETS—Effective for diarrhoeal diseases of both baby chicks and grown fowls; a bowel astringent given in drinking water. Once the tablets are in solution they remain so indefinitely. The water is thoroughly medicated and is all good until used. Pkg., 100 tablets, 50c (postpaid, 55c); pkg., 225 tablets, \$1.00 (postpaid, \$1.10).

FOR BETTER LAWNS

Sow **DIGGS & BEADLES Velvet Green Lawn Grass**, which is composed entirely of the very highest grade and most suitable grasses for making a beautiful lawn as respects color, texture and permanency.

We have made a careful study of the difficulties met with in making a pretty and permanent lawn, and after many years of experiment we have made this perfectly balanced mixture of American and European Grasses which do best in our climate. Only the finest grades are used in this mixture, both as to purity and germination.

DIGGS & BEADLES Garden and Lawn Enricher applied now makes beautiful lawns in the Spring.

What to do in January

JANUARY—If your hotbeds have not been prepared attend to them at once and sow Cabbage, Lettuce, Beets, Radish, Cauliflower and Onions. Sow hardy Flower Seeds in hotbeds for early blooming. Secure manure and cut pea and bean poles. Top-dress grain and grass fields with manure.
